

Predictive Maintenance

Unscheduled downtime due to mechanical failure can be costly and counter-productive. The ACR SmartButton temperature recorder can help to enhance procedures for the predictive maintenance of motors, pumps, bearings and casings. Temperature readings can be compared to manufacturers specifications so that equipment failure can be predicted.

ORDERING INFORMATION

Item:

SmartButton (Single)
SmartButton Starter Pack* (USB)
SmartButton Starter Pack* (Serial)

Cat#:

01-0180
01-0182
01-0181

*Starter Pack includes:
One SmartButton Data Logger
SmartButton Reader Software CD
USB or Serial interface cable
Quick Start Guide
